## INDUSTRIAL PACKAGING

**Better performance –  
better protection.**

patented geometrical features of the bottom plate ensures the highest degree of stability and minimum of residual contents

warp-resistant tubular steel grid jacket made via a patented welding process

additional corner guards protect the inner container

specially reinforced bottom plate

### **Onward and upward with the ECOBULK MX.**

Its excellent properties of static stability render the ECOBULK MX ideal for high bay warehousing. The patented geometrical features of the bottom plate ensure the highest degree of stability and minimum residual contents. The ECOBULK MX is available in a variety of equipment packages and approved for filling goods up to a maximum density of 1.9.

### **Safeguarded from extraneous effects.**

The specially reinforced bottom plate coupled with the warp resistant tubular steel grid jacket, made via a patented welding process, perfectly safeguard the ECOBULK MX from any extraneous effects. Corner guards made of polyethylene further protect the inner container.

### **Multi-trip capabilities to protect the environment.**

The SCHÜTZ TICKET SERVICE, a unique retrieval and reconditioning system, helps to preserve resources and protect natural foundations of life.
